

Amendments to the Specification:

1. Please replace the title of the invention with the following:

"Method for Storing an Image and Data Representative of the Image on a Media"

2. Please replace the abstract with the following amended abstract:

The invention, in one embodiment, is an image storage method that includes ~~comprising~~ receiving a first image; outputting a likeness of the first image onto ~~on~~ a media based on the first image; and placing an encoded representation of the first image onto ~~on~~ the media based on the first image. In another embodiment, the invention is an image storage method that includes ~~comprising~~ receiving a first media including an encoded representation of an image; and replicating a likeness of the image onto ~~on~~ a second media based on the encoded representation of the image. In a further embodiment, the invention pertains to an image storage media, the media including ~~comprising~~ a first surface adapted for displaying a likeness of an image; and a second surface configured for storing an encoded representation of the image, the first and second surfaces being in communication with each other. ~~In yet another embodiment the invention pertains to an image processing system comprising means for receiving a first image; means for printing a likeness of the first image on a media; and—means for storing an encoded representation of the first image on the media.~~
